

30 and 50 mL Centrifuge Tubes

30 & 50 mL Centrifuge Tubes

Designed for centrifugation, used for much more.

Our 30 and 50 mL centrifuge tubes are ideal for general laboratory analysis, specimen collection and transport, or as leak-proof secondary containers. Each tube is tested to 95kPa for sealing assurance.

Tubes are available in both freestanding and conical versions. The 30 mL is perfect for medium-sized samples and is the only 30 mL container on the market designed for centrifugation. Freestanding versions are designed to lock into Caplugs Evergreen trays, allowing for one-handed processing and easy handling.

30 and 50 mL centrifuge tubes are available sterile or non-sterile. Sterile versions are available in trays of 20, or packs of 10.

Additional options available for helping meet the needs of your laboratory, customers, or end users:

- Printing
- Private labeling
- Other secondary services
